

PROTECT SURFACES QUICK AND EASY

WITH OUR PROTECTIVE FLEECE FOR NEW BUILDINGS
AND RENOVATION

SAFE PROTECTION FOR HIGH-QUALITY SURFACES

The non-slip indoor protective and covering fleeces from UZIN provide comprehensive protection for finished floor coverings, stairs, installations and a large number of other surfaces from any contaminations during building and renovation work. Their efficiency is based on their excellent, self-adhesive anti-slip coating, which ensures superb securing on the floor. Despite this, the protective webs can be easily and completely removed without leaving any residue, and are suitable for reuse.

UZIN PF 120 CLASSIC and **UZIN PFB 160 BLUE** are additionally equipped with a waterproof surface, thus providing additional protection against all types of liquid. The premium quality of the used fibres and their coating ensures a reliable application and makes the protective and covering materials from UZIN the perfect choice for use on all building sites.

YOUR ADVANTAGES

- + Non-slip coating guarantees high safety and protection at work
- + Material is washable and thus easy to clean
- + Economical and environmentally friendly through reuse
- + Time-saving and easy application, as self-adhesive
- + Extremely sturdy, due to durable anti-slip coating and dense fibre structure
- + 100% residue-free and easy removal
- + Can be easily rolled up for reuse
- + Universal application area
